Section R401.3 of the 2012 International Energy Conservation Code (IECC) was revised to read as follows: "A permanently installed home thermal energy component certificate approved by the building official shall be completed and posted on an interior wall within the garage by the builder or registered design professional."

This advisory is to inform you that SNBO has reviewed several sample certificates provided by the IECC Technical Committee. SNBO has approved the attached sample certificate as meeting the minimum requirements for an energy certificate as stated in R401.3. Other certificates that include, as a minimum, the information shown on this certificate will be acceptable for the purposes of this code requirement.

cc: SNBO Building Officials
